

How can Singapore be a smarter and more secure energy future?

By enabling more cities to better manage and coordinate their energy technologies, they can pave the way towards a smarter and more secure energy future. Work with Singapore companies that have developed strong capabilities in energy management and optimisation, and are developing clean energy infrastructure for greater efficiency.

Will Singapore's Energy Grid be future-proofed?

As part of Singapore's energy transition, the Energy Market Authority (EMA), together with industry partners, have embarked on digital projects to future-proof the nation's energy grid infrastructure.

How can Singapore companies support Smart Grid implementation?

From large-scale energy storage technologies to portable power generation sets and smart battery management systems, Singapore companies provide energy storage solutions to support smart grid implementation, and stronger integration of renewable energies.

Can Singapore lead the way in digitalising the energy sector?

The energy world is like a symphony that needs to be well-orchestrated. What Singapore has going for it is a government with a strong understanding of top-level architecture and design, and the synergies needed for info-sharing and inter-operability. That stands it in good stead to lead the way in digitalising the energy sector.

Is Singapore developing a digital twin & distributed energy resource management system?

There has been good progress in the development of Singapore's first Grid Digital Twin and Distributed Energy Resource Management System, and they will continue to be developed over the next few years.

What is Singapore's upcoming grid digital twin?

Supported by the Energy Market Authority (EMA), SP Group (SP) and the Science and Technology Policy and Plans Office (S&TPPO) under the Prime Minister's Office, the upcoming Grid Digital Twin will serve to enhance Singapore's grid resilience to ensure grid reliability and support the deployment of cleaner energy sources.

Smart Energy Pte Ltd (SEPL) is a home-grown provider of clean energy in Singapore, powering both local motorists and industries with compressed natural gas (CNG) and high quality diesel (Euro-5). Established in 2006, Smart Energy began its journey by pioneering the first two CNG refuelling stations in Mandai and Serangoon areas to meet the needs of the growing local CNG ...

Vietnam - Singapore Smart Energy Solutions (VSSSES) | 2,436 followers on LinkedIn. Delivering sustainable and innovative energy solutions that support growth and development in Vietnam | Vietnam - Singapore Smart Energy Solutions JSC (VSSSES) is a joint venture between Becamex IDC Corporation (Becamex IDC),

Singapore"s Sembcorp Industries (Sembcorp), and Vietnam ...

Launched in June 2020, HomeAuto Solutions Pte Ltd endeavors to enhance the quality of life with automation. Bravely facing the obstacles presented by COVID-19 and its aftermath, they have established three main business categories: Smart Home, Smart Office and Smart Care - all falling under their distinctively branded trademarked products line known as ...

Technology firm Hitachi ABB Power Grids has partnered with research institute Nanyang Technological University, Singapore (NTU Singapore) on a government-led smart grid development project. ... Smart Energy International is the leading authority on the smart meter, smart grid and smart energy markets, providing up-to-the-minute global news ...
