

Who is Skyray?

At first the team was composed of two expert engineers. Now, SKYRAY is able to propose services from about 25 specialists in solar and storage, with widespread expertise in electrical, Solar PV, Construction, Civil, and Project Development sectors.

Is Madagascar ready for solar power?

With all regions of Madagascar enjoying over 2,800 hours of sunlight per year, the Grande Ile is the perfect location for development of solar power, with a potential capacity of 2,000 kWh/m<sup>2</sup>/year. The Government is counting on this potential to fulfill its objective of providing energy access to 70% of Malagasy households by 2030.

What is Skyray & how does it work?

SKYRAY was formed to provide complementary services to leading developers, investors and EPCs across the EU, giving them expert technical support to build their solar PV projects. At first the team was composed of two expert engineers.

Where to build a solar power plant in Madagascar?

The ministry is seeking proposals for the construction of a 200 MW solar power plant located in Ihazolava near the national capital, Antananarivo. They also plan to build a 10 MW PV facility in Mahajanga on the north coast of Madagascar. Interested developers have until Aug. 9 to submit their proposals.

How many MW solar project in Madagascar?

Madagascar has tendered a 200 MW solar project near Antananarivo and a 10 MW facility on its north coast. Madagascar's Ministry of Hydrogen and Hydrocarbons has published two tenders for the deployment of a total of 210 MW of PV capacity.

What is Scaling Solar in Madagascar?

Madagascar is currently the fifth country in Africa in which a Scaling Solar tender process was launched, after two tender processes in Zambia, one in Senegal, and another in Ethiopia. It is also the first Scaling Solar project to include solar energy storage requirements by pairing solar with batteries.

For Madagascar, the third African country to join Scaling Solar, a new 30-40 megawatt solar facility will help ease daily interruptions of power service. This island nation suffers from frequent power outages, and under one-third of the population has access to electricity.

Three large-scale heavy fuel oil (HFO) plants in Madagascar are being hybridised with solar PV thanks to a USD 6 million bridge loan from REPP to developer Lidera Green Power (Lidera). Currently, 75% of the country's power is generated from expensive and high-emission HFO and diesel plants, but the government is

keen to reduce dependence on ...
