The app is the same price essentially of the wifi dongle. The wifi dongle also allows remote upgrades direct
from China, so I personally do not want to allow that, but that is just me. Did you know you can actually shut
off ...

The app is the same price essentially of the wifi dongle. The wifi dongle also allows remote upgrades direct
from China, so I personally do not want to allow that, but that is just me. Did you know you can actually shut
off the inverter over that Smart ESS app, and even logging into the web browser? Bit odd functionality if you
ask me.

For those of you who have the WatchPower related app Smart ESS for Voltronic type inverters (EG4, MPP,
Sungoldpower, etc) there has been an update to the latter. It has improvements, i.e. when you look at the
Analysis tab parameters like PV voltage, charging power, grid voltage, etc, it shows more precise time data as
you scroll across the screen.
