Why is Australia a good place for solar energy production?

Australia gets the highest sunlight worldwide, making it an excellent place for solar energy production. The country's sunny weather and large open spaces make it well-suited for generating solar power. However, climate change is a severe problem for Australia, affecting its environment, economy, and people.

Does Australia have rooftop solar?

At the end of 2018 Australia had just over 8 GW of rooftop solar. Even though Australia had a world-leading solar uptake, the study found the country was using less than 5% of its potential capacity for rooftop solar as of June 2019.
