

How can Etech solar help Vanuatu?

The sun is a powerful source of renewable energy. We can harness that energy to create a sustainable future in Vanuatu and the world. eTech Solar is accelerating the adoption of quality yet affordable solar technology across Vanuatu to conserve our environment and provide an environmentally friendly and sustainable power supply.

Why should you go solar in Vanuatu?

In an era of climate change and unsustainable environmental practices, by embracing solar power Vanuatu can forge ahead with providing affordable, clean energy for all its people. More than ever, a great time to go solar!! Reduce your electricity costs.

What is Offgrid living in Vanuatu?

Offgrid Living for many of Vanuatu's residents is synonymous with getting out of the hustle and bustle of the big city and enjoying a quiet and more relaxed lifestyle. PCS seeks to improve Vanuatu's Island Living through the provision of high quality solutions from reputable suppliers who understand remote living.

Solar-powered appliances come in many different shapes and sizes, so there is something here for everyone. Solar power is a natural source of renewable energy which is environmentally friendly, safe, cost-efficient, and freely available. The sun provides 1.5 kW/m² of solar irradiance to the earth's surface daily.

List of the must-have 5 Best Appliances for Solar Power: In the following sections, we'll uncover these remarkable solar powered appliances that serve essential functions. They encapsulate the advantages we've explored earlier. They range from refrigeration to security and outdoor lighting. These gadgets illuminate the path towards a ...

With the remoteness of the islands and limited access to centralised utilities, PCS also offers self supporting products suitable for the Vanuatu environment, including solar showers, hand spears, personal solar lighting and Lifestraw ...

Solar appliances fall in two broad categories; one, solar photovoltaic based appliances that produce electricity to power DC type of electrical devices, and the other, solar thermal systems that use the heat to produce heating which can be used for generating hot water or for cooking.

Many people still view solar power as unreliable or complex or not as cost-effective as we'd like, which also puts a damper on the solar appliances aisle. The media often focuses on the "new and shiny". Solar appliances, representing a gradual shift towards sustainability, don't fall into that category.

Urban Household Appliance & Energy Use Survey: Port Villa & Luganville, Vanuatu (2013), Volume 1: Main Report This report was prepared by the International Institute for Energy Conservation (IIEC) in collaboration with Vanuatu Department of Energy & Meteorology, UNDP Pacific Centre, SPC CCCPIR Energy Component and the Vanuatu National ...
