Aurora Solar is delighted to announce a partnership with projetsolaire , France's leading solar project management software, working together to help accelerate the process of going solar in France.

A Bordeaux-based GreenTech company with the FrenchFab label, the company designs, develops and manufactures sustainable, connected solar streetlights in France. Present in more than 60 countries, we bring public lighting to rural areas without electricity and also accompany the development of smart cities.

The "France PV Industrie" project aims to build a giga-factory for solar panels based on a new technology, with a dual objective: to produce more efficient solar panels locally and to create a sustainable and sustainable industry, by leveraging a strong growth market and disruptive technology.

RWE has all the resources and skills needed to design, build, operate and maintain our solar farms. Our teams work closely with local stakeholders, drawing on their expertise to develop projects that are concerted, efficient and deliver value for the local community.

Founded in 2011, Sunna Design is a leading French designer, developer and manufacturer of intelligent, sustainable and connected solar streetlights. Thanks to our cutting-edge, patented technology, we offer solar lighting solutions that meet the economic, environmental and social challenges of territories around the world.
