

Is Elite solar establishing an 8 GW solar manufacturing hub in Egypt?

SINGAPORE, Sept. 10, 2024 /PRNewswire/-- EliTe Solar, a leading global provider of integrated solar manufacturing solutions, has announced an investment to establish an 8 GW solar manufacturing hub in the Suez Special Economic Zone in Egypt, following discussions with Egypt's Prime Minister and the Chairman of the Suez Special Economic Zone.

Will Egypt become a central hub for photovoltaic manufacturing?

"This venture will position Egypt as a central hub for photovoltaic manufacturing in the Middle East and North Africa," said Derek Liu, Chairman of EliTe Solar. "With a planned total production capacity of 8 GW, we are introducing solar technology to revolutionize local supply chains and manufacturing standards."

Will Egypt become an energy hub?

As part of the country's plan to become an energy hub, Egypt has constructed several energy interconnectors. There is one with Jordan with a capacity of 250 MW, which is expected to increase to 450-500 MW. There is a smaller one with Sudan with a capacity of 80 MW, which is expected to increase to 300 MW.

Why should Egypt invest in a new solar plant?

This major venture, marking a significant expansion into the Middle East, will support the region's growing renewable energy demand and contribute to Egypt's clean energy future. The new facility will ensure the production of high-efficiency solar cells and module assembly.

Will Elite solar be able to make money in the Middle East?

Upon full operation, the facility is projected to generate annual sales exceeding \$190 million, further reinforcing EliTe Solar's presence in the Middle East. "This venture will position Egypt as a central hub for photovoltaic manufacturing in the Middle East and North Africa," said Derek Liu, Chairman of EliTe Solar.
