

How much does a solar system cost in New Jersey?

Compare Quotes From Top-rated Solar Panel Installers In New Jersey, the average cost of installing a residential solar system is \$2.75 per watt, or \$13,750 for a 5-kW system, before any tax credits or incentives are included. A solar panel system of 5 to 8 kW is a good size for most New Jersey homeowners.

Are solar panels a good investment in New Jersey?

With the cost of electricity rising, solar panels can help to offset your utility bills. In New Jersey, the average cost of electricity is higher than the national average, making the potential savings from solar even greater. Plus, with net metering, you can earn credits for the excess electricity your system produces.

Are solar panels cheaper in New Jersey?

Going solar in New Jersey is cheaper than the national average, thanks to the state's property tax exemptions and solar renewable energy credits (SRECs). Many solar energy customers we talked to in New Jersey are delighted with their decision to invest in solar panels.

Can a solar system save money in New Jersey?

The potential savings are substantial, given that New Jersey's electricity rates are higher than the national average. Over the lifespan of a solar system, typically 25 to 30 years, these savings can amount to tens of thousands of dollars.

Does New Jersey have a solar investment tax credit?

Still, the federal solar investment tax credit (ITC) is a huge factor in reducing the cost of going solar. The average ITC value in New Jersey is \$5,310. If you install a residential system by the end of 2032, you can deduct 30% of the system's total cost -- including equipment, labor and permits -- from your federal taxes.

What size solar panels do I need in New Jersey?

A solar panel system of 5 to 8 kW is a good size for most New Jersey homeowners. The cost of solar panels may vary depending on the size of your system, the type and brand of solar panels you choose and other rebates available.

An inverter then converts the direct current (DC) electricity generated into alternating current (AC) for use in your property. Installing a solar PV system in Jersey won't materially reduce your carbon footprint, when replacing electricity, ...
