

Are solar panels a good option in France?

More and more companies are either selling, or installing, solar panels for people across France. This, coupled with rising energy costs, continues to make solar panels appear an attractive alternative to gas or electric energy sources, for both homeowners and businesses. Here we answer eight common queries about solar panel installation in France.

Can I get a grant if I install solar panels?

Certain financial grants are only applicable if you install panels via an RGE-certified firm. If your solar panels are to be connected to the grid or have a storage system, the work must be approved by Consuel (Comit   National pour la S  curit   des Usagers de l'Electricit  ).

How much does it cost to install solar panels?

It costs around EUR10,000 for a modest-sized solar photovoltaic system and at least EUR5,000 for a solar thermal system heating hot water only and around EUR14,000 or more for one that also feeds into your central heating system. Do I need permission to install panels?

Can I install solar panels myself?

It is possible to install the panels yourself, if you purchase solar-panel installation 'kits', which may include panel providers sending a certified electrician to sign-off on regulatory paperwork and check your installation.
