As of 2024, the average cost of solar panels in Georgia is \$3.06 per watt, making a typical 7.2 kilowatt (kW) solar system \$3.06 after claiming the 30% federal solar tax credit now available. This is just about the average price of residential solar ...

The temperature coefficient represents the relative change in power output with respect to the ambient temperature. Solar panel efficiency is related to the quality of the panels and solar cell technology (monocrystalline, polycrystalline, thin film). Panel efficiency commonly ranges from 12-21 percent with respect to the cell technology.

And the average price tag for solar panels in Georgia? About \$3.74 per watt. So, if you're reaching for your calculator, let me save you the trouble: A 10-kW system will set you back approximately \$37,400. Here's the simple equation we used: (\$3.74 price per watt X 10 kW system size) X 1,000 = \$37,400.

Find Cost Savings on Solar Panels in Georgia . The cost information presented in this article is derived from a comprehensive analysis, incorporating data from multiple industry sources. The average cost per watt per state was calculated based on figures from Consumer Affairs, Energy Sage, and Berkeley Lab's Electricity Markets & Policy ...
