

We are a solar panel installation company helping homeowners in the Algarve transition to clean, free and renewable energy. As solar experts, we offer a range of efficient and low-maintenance solutions, including solar panel installations, solar batteries, solar carports, home EV charging installations, and off-grid solutions.

Portugal became the latest country to coast solely on renewable energy this month, going without fossil-fuel power for four days straight. Denmark, Germany, and others recently have declared ...

The renewable power sector has been growing consistently in Portugal in recent years, with grid operator Redes Energéticas Nacionais (REN) noting that clean power accounted for 61% of the country ...

The European Commission has approved a EUR350 million (\$380.4 million) funding package to support companies in Portugal that produce solar panels, batteries, heat pumps, and other renewable energy ...

Portugal has also invested more in renewable energy sources than many other EU countries, particularly in wind and solar power. However, Portugal faces challenges in transitioning to sustainable energy practices, including the high cost of renewable energy projects and the need for infrastructure upgrades.

The European Investment Bank (EIB) and Iberdrola have signed a new agreement to accelerate Portugal's energy transition via the development of new renewable energy plants. The EU bank will provide a EUR70 million green loan for the construction of a portfolio of projects with a total capacity of around 188 megawatts (MW). These new facilities, awarded ...

Situated in the municipalities of Alenquer and Azambuja, the Cerca Photovoltaic Plant features an installed capacity of 202 MWp and over 310 thousand bifacial solar panels, capable of absorbing solar energy from both ...

Portugal is solidifying its position as a European leader in renewable energy, making significant strides toward a greener future. In 2023, renewable sources accounted for 61% of the country's electricity consumption, a remarkable achievement driven by favorable weather conditions, technological advancements, and heavy investments in wind, water, solar, and ...

Portugal is solidifying its position as a European leader in renewable energy, making significant strides toward a greener future. In 2023, renewable sources accounted for 61% of the country's electricity consumption, ...

Solar energy is a form of renewable energy, in which sunlight is turned into electricity, heat, or other forms of energy we can use is a "carbon-free" energy source that, once built, produces none of the greenhouse gas

emissions that are driving climate change. Solar is the fastest-growing energy source in the world, adding 270 terawatt-hours of new electricity ...

EDP now owns 540 MWp of solar capacity in Portugal, a technology crucial for the country's energy transition. This milestone was achieved with the commissioning of EDP Renewables' largest solar plant in Europe, located in the Lisbon district.. Situated in the municipalities of Alenquer and Azambuja, the Cerca Photovoltaic Plant features an installed capacity of 202 ...

Alqueva's future is one of continued growth and innovation. EDP plans to add 70 MVA of floating solar power to the existing capacity, secured in Portugal's first floating solar auction in 2021. This expansion will significantly increase renewable energy production without affecting the natural beauty or other uses of the reservoir.

Consumption of renewable energy in Portugal 2010-2023; Installed power capacity in Portugal 2023, by source ... Monthly production of solar PV power in Portugal 2023; The most important statistics.

Portugal is also home to Europe's largest floating solar farm, built with 12,000 panels, and the county has pledged to double its solar and hydrogen capacity. In other words, Portugal means ...

EDP Renovaveis, the world's fourth-largest renewable energy producer, has brought on stream a 202-megawatt (MW) solar energy park in central Portugal, its largest in Europe, its controlling ...

"What if every rooftop could harness the sun's power, and every community could thrive on clean energy?" In a bold announcement, Portugal recently surpassed its entire solar output from 2023 by September ...
