Solomon Islands Government energy division director John Korinihona rejected any accusation of corruption or self-interest from the government as a cause of the high energy costs, and instead pointed to a planned "tariff reduction" to help reduce costs.

Is expensive power holding back Solomon Islands' Development?

Solomon Islands MP Peter Kenilorea Junior says expensive power is holding back Solomon Islands' development. (ABC News: Luke Bowden) Mr Kenilorea, an opposition MP and outspoken critic of the Sogavare government, says the impacts of the high costs of power are "massive".

What percentage of Solomon Islanders have access to power?

On top of the cost, according to advocacy groups only about 15 to 20 per cent of Solomon Islanders have access to power. For Solomon Islands' MP Peter Kenilorea, it is a major roadblock in the country's economic growth and "not something to be proud of".

What is Solomon power?

Solomon Power's mission is "to provide a safe, reliable, affordable and accessible supply of electricity to the Solomon Islands". Solomon Power received SBD1.5 million for the provision of community service obligations (CSOs) in 2018, while no CSO received since 2019 - present.

Why are electricity prices so high in Solomon?

According to Martin Sam, the acting chief executive of state-owned Solomon Power, the country's energy authority, the causes of the high prices are "complex". He says the country's geography, with a population of 700,000 spread over hundreds of islands, is one cause. The other is the source of electricity.

The first large utility-scale renewable energy project for the Solomon Islands delivering benefits such as more affordable electricity and improved accessibility to cleaner, more reliable energy sources for communities now and in the future.

The Project forms part of a broader initiative of Solomon Islands Electricity Authority (SIEA), trading as Solomon Power, the state-owned enterprise responsible for energy generation and distribution within the Solomon Islands. Solomon Power has recently started to invest in strengthening and expanding its system.

This project includes the supply and installation of 2 new 1.5 MW Caterpillar generators at the Honiara Power Station. This project is aimed at providing at least a G-1 level of supply reliability. The new generators are also used as a backup supply for Honiara when generation capacity in Lungga is reduced for reasons such as maintenance.
