

How much will a solar PV project cost in Solomon Islands?

Component 3: US\$ 2.5million to add grid-connected solar power to contribute to the overall share of renewable energy in Solomon Islands energy mix. Solomon Power has identified three possible sites for grid-connected solar PV, not all of which are likely to be funded under the Project. These include:

How long do solar panels last in Solomon Islands?

The majority of solar energy systems installed in Solomon Islands last less than 2 years due to bad system design and poor user training. Superfly's systems are designed to last a minimum of 5 years (for basic systems) and 10 years for premium systems.

How many solar homes are there in the Solomon Islands?

"Solomon Islands currently has one of the lowest levels of access to electricity in the region, with over 85% of the population of Solomon Islands still without access to electricity and for this project alone, we received over 6,000 applications to obtain only 2,000 solar home systems," said Mr Aimaeta.

Can photovoltaics be used for rural electrification in the Solomon Islands?

The success of the Sukiki project in the Solomon Islands, where photovoltaics are used for rural electrification, has brought delight to the government and people. They hope that continued use of photovoltaics for rural electrification will serve as a beacon of hope, not just for the Solomons but for the rest of the world as well.

Will the Solomon Islands be submerged in the next 100 years?

As a low-lying archipelago in the South Pacific, the Solomon Islands faces the real possibility that a significant portion of its territory will be submerged underwater in the next 50 to 100 years if global warming raises ocean levels as projected by climate scientists.

The existing panels were Back 40 Solar and the new panels were Rich Solar. They both can be attached to the mount, however their dimensions are not the same on length or width. And that caused our problem. The mount (VC2-HR8) is designed to hold 16 x 100 watt panels. However, rail length is specifically for Back 40 panels.

The 12V/24v in product titles (ex. 150w 12v cIGs Solar panel) does not refer to the actual voltage (Voc or vmp) of the solar panels, but rather to the voltage of the solar system or energy storage system to which the panel is best suited. The voltage of the solar panel must be higher than the solar system voltage.
