

Who is my solar energy Sri Lanka?

Thanks for submitting! MySolar Energy is an all-in-one full service energy provider in Sri Lanka. Our in-house team takes care of every part of your project. My Solar Energy Sri Lanka.

Are residential solar systems a viable solution in Sri Lanka?

As energy costs continue to rise and concerns about environmental sustainability grow, many homeowners in Sri Lanka consider residential solar systems as a viable solution. A well-designed solar power system can significantly reduce electricity bills, contribute to environmental sustainability, and even provide a backup power source during outages.

Why should you choose a residential solar system in Sri Lanka?

Adopting a residential solar system in Sri Lanka can lead to substantial savings on electricity bills, enhance energy security, and contribute to environmental sustainability. Whether opting for an on-grid, off-grid, or hybrid system, working with certified professionals is crucial to ensure a properly designed and installed system.

How does a solar system work in Sri Lanka?

Solar Panels: These are the most visible components of a solar system. Solar panels convert sunlight into direct current (DC) electricity. The efficiency of these panels can vary, but in Sri Lanka, with its average solar irradiation of around 4.5 to 5.5 sun hours per day, solar panels can generate significant amounts of electricity.

How much does a solar system cost in Sri Lanka?

Residential solar installations in Sri Lanka typically start at around 500,000 LKR to 750,000 LKR for basic setups. With a budget of 500,000 LKR, you can generally expect a solar system producing approximately 2 kW to 3 kW of power. If you have a budget of 750,000 LKR, the system size might range from about 3 kW to 5 kW.

How long does a solar installation last in Sri Lanka?

The payback period for industrial solar installations in Sri Lanka typically ranges from 3 to 4 years. Efficient project designs and use of high-quality components contribute to favorable ROI. The upfront costs for a factory-sized solar installation can be significant.

Develop two 100 MW floating solar plants at the Samanalawewa Reservoir with the Ceylon Electricity Board (CEB). Submit proposals by Dec 13, 2023. Boost Sri Lanka's solar energy market and join the 714 MW installed capacity.
