

What is the Sussex Energy Group?

Find out about the group and see its research themes. The Sussex Energy Group is co-directed by Dr Marie Claire Brisbois, Dr Mari Martiskainen and Dr Matthew Lockwood. The Sussex Energy Group aims to understand and foster transitions towards sustainable, low carbon energy systems.

Who are the working group members of Myanmar energy statistics 2019?

The working group consists of experts from the Oil and Gas Planning Department, Ministry of Electricity and Energy; and ERIA. Working group members have been contributing their time and expertise to the project after successfully launching Myanmar Energy Statistics 2019.

What energy sources are available in Myanmar?

Myanmar is endowed with rich natural resources for producing commercial energy. Currently, the available energy sources in Myanmar are crude oil, natural gas, hydropower, biomass, and coal. Wind energy, solar, geothermal, bioethanol, biodiesel, and biogas are other potential energy sources.

Does Myanmar have a comprehensive energy policy?

Myanmar does not have a comprehensive national energy policy setting out a systematic approach to energy planning, policy formulation, and sector development.

What is Myanmar doing about energy efficiency & conservation?

To this end, Myanmar has implemented a range of energy efficiency and conservation goals and action plans targeting energy savings in all sectors of the economy and in cooperation with both the private and public sectors.

Sussex Energy Group. How to reduce energy use for a successful transition to net-zero. Research from the Sussex Energy Group (SEG) is tackling key questions about how to reduce society's demand for, and use of, energy. Using less energy is not only important to households concerned about rapidly rising bills. It's also vital for a fair ...
