That"s one of the most vexing questions standing in the way of a greener electrical grid. Massive battery banks are one answer. But they"re expensive and best at storing energy for a few hours, not for days long stretches of cloudy weather or calm. Another strategy is to use surplus energy to heat a large mass of material to ultrahigh ...

As the ocean currents meet around the island, air masses and air currents also converge, producing strong winds and a high wave energy along the coast of the island. From Iceland the North-Atlantic Midoceanic
