

What is trackso solar?

TrackSo Solar is a cloud based energy management IoT platform to track your solar PV system's performance, identify anomalies and provide immediate support, giving you a full control over your system without actually being present there.

What is trackso & energy management?

Manage your assets from anywhere, anytime. Trackso simplifies the way you operate and maintain your assets. IoT & Energy Management A cloud-based IoT platform to enable you to monitor, operate and maintain your energy systems remotely, giving you full power to optimize system performance and minimize maintenance costs.

Where does solar energy come from in Syria?

The use of solar energy spreads from northwestern Syria, which started relying on solar power around 2016, passing through areas in the north-east, ending with the areas under the control of the Syrian regime, which directed a clear trend to generate electricity through them, not only in large industrial facilities but even in homes.

Is Syria a good country for solar energy?

Regarding wind energy, which is the second source of energy, Syria is not considered one of the countries that have a sufficient amount of wind throughout the year to produce electricity, and therefore the solar energy situation is regarded as the best in it.

Are solar panels a viable alternative energy source in Syria?

As an option that seemed to be one of the best alternative energy sources in Syria, reinforced by the absence of fuel, the spread of solar panels began in most regions, respectively, years ago, amid "government" support and adoption of this trend.

How much does a solar system cost in Syria?

The cost of solar systems for most domestic uses, outside the framework of production projects, ranges between 4 million and 14 million Syrian pounds, according to what Enab Baladi monitored from the websites of companies that install power systems in regime-controlled areas.

TrackSo's Group Control syncs multiple Diesel generators and solar inverters via a single device, simplifying monitoring and control. TrackSo Brochure; ... We at TrackSo have come across 50+ solar plants where synchronizing PV with multiple DGs (Diesel generators), that run on separate circuits/bus bars but are combined when the grid is ...

The solar irradiation sensor or solar pyranometer measures global radiation, the sum at the point of

measurement of both the direct and diffuse components of solar irradiance. The sensor's transducer, which converts incident radiation to electrical current, is a silicon photodiode with wide spectral response.

TrackSo runs on the same infrastructure that Google uses internally for its end-user products, such as Google Search and . All data is encrypted in transit between Google, the customers, and the data centers. The data stored on persistent disks is encrypted under 256-bit AES and each encryption key is also encrypted with a set of regularly changed master keys.

Easy visualisation of sensor data on TrackSo Cloud Portal. Calculate PR, Expected vs. Actual Power Output, Module Efficiency etc. Immediate identification of defects and malfunctions in Solar PV systems. Immediate anomaly ...

For those seeking advanced solar monitoring solutions, TrackSo invites you to connect for a journey where excellence meets precision. Learn and then earn it the right way with TrackSo. Schedule a demo with us through mail ...

Alarms section is yet another premium feature of Trackso platform, wherein a user can collectively witness the faults, anomaly occurring at the site level that can hamper the production of solar output. The alarm codes generated by the units/inverters are picked and interpreted efficiently by the Trackso platform for an extensive user experience.

TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. Ltd. TrackSo monitors & manages energy assets to provide you with optimised information, hence allowing you to derive key business outcomes. Product is live since 2017.

On the unit page you will find : Unit: Name of the Unit; Unit_key: Unique identifier used by Trackso to carry the communication in the network.; Category: The category defines the category to which that unit belongs eg: Inverter, Meter, Sensor, Derived etc.; E.today: Total energy produced by the inverter on the current day.; E Total: Total Energy produced by ...

Datasheet & Manual-Solar Module Temperature Sensor MSPT100 Author: TrackSo Solar Subject: Datasheet & Manual-Solar Module Temperature Sensor MSPT100 Keywords: Datasheet & Manual-Solar Module Temperature Sensor MSPT100 Created Date: 12/25/2021 3:23:24 PM

The use of solar energy spreads from northwestern Syria, which started relying on solar power around 2016, passing through areas in the north-east, ending with the areas under the control of the Syrian regime, which ...

With TrackSo's latest update we have enabled the feature to upload your company's logo in your TrackSo account. Now every time you log in to the TrackSo portal you can see your company's logo shining bright. Steps. Navigate to User > My Account in your TrackSo Account. Click on Update Logo field

A WMS is one of the key components in a solar power plant. It's function is to gather the data of weather parameters such as solar radiation, Module surface temperature, Ambient temperature, wind speed etc. at any solar pv site which helps to monitor the efficiency and performance of the power plant. ... TrackSo is an IoT based SaaS product ...

Learn and get started with the TrackSo for monitoring of your solar power systems ... TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. Ltd. TrackSo monitors & manages energy assets to provide you with optimised information, hence allowing you to derive key business outcomes. Product is live since 2017.

Learn how to use TrackSo Solar IoT Platform to monitor and analyse energy generation and performance of all your solar power plants. 2. Download Energy Reports. Learn how to download daily/monthly/yearly energy generation reports for your solar power plants. 3. ...

2 ways to get string-level data in a solar system and the advantages of having it! With gaining popularity for renewable energy production, solar PV is leading the market in many countries around the world. ... TrackSo is an IoT based SaaS ...

Watch TrackSo Live In Action! Our representative will walk you through TrackSo IoT/Solar platform & features using Zoho Meetings or Anydesk; We'll understand your challenges and show you how TrackSo can help fix or optimize them; The web demo can last anywhere from 20 minutes to 1 hour
