

Sion Tom® and Prncipe store lithium ion batteries

How is Sion accelerating the performance of lithium metal battery technology?

Sion is accelerating the performance of lithium metal battery technology and forging a path to an anode free battery. Batteries made using Licerion rechargeable technology offer applications key performance advantages over other technologies.

What makes Sion Power a good battery?

Additives in Sion Power's proprietary electrolyte system further improve safety and extend cycle life. The result is a battery that offers the highest combination of energy density, specific energy, and cycle life available. Suited for many types of applications, including aerospace, discover why Licerion is right for you.

What temperature should a lithium battery be stored?

The ideal temperature range for lithium batteries is typically between 20°C and 25°C (68°F and 77°F). Avoid storing them in areas where the temperature can drop below freezing point. 5. Use Proper Packaging: If you're storing loose lithium batteries, place them in a secure and non-conductive container or individual battery storage cases.

What are Sion Power's Standard battery packs?

Sion Power is developing standard battery packs, using the Licerion-HE cell, to include: Sion Power has performed safety tests on cells and batteries which include nail penetration, external short circuit, overcharge, and heat application tests. Additional tests are performed based on customer requests.

How do you store a lithium battery?

Store in a Cool, Dry, and Stable Environment: Find a suitable storage location that protects the batteries from extreme temperatures, moisture, and direct sunlight. The ideal temperature range for lithium batteries is typically between 20°C and 25°C (68°F and 77°F). Avoid storing them in areas where the temperature can drop below freezing point. 5.

What are lithium batteries?

Lithium batteries are rechargeable batteries that use lithium ions to store and release energy. They have gained popularity due to their high energy density, longer lifespan, and lightweight construction.
