Does Emerson own network power?

In August 2016, Emerson announced the sale of the Network Power business to Platinum Equity and a group of co-investors. Headquartered in Columbus, Ohio, the company is a leading provider of thermal management, A/C and D/C power, transfer switches, services and information management systems for the data center and telecommunications industries.

What are Emerson's sustainable grid solutions?

Emerson's Sustainable Grid Solutions transform unpredictable renewable energy into predictable, reliable power. With real-time demand forecasting, operational visibility and analytics, decision-making becomes easier and more precise.

What is Emerson battery energy management system?

Emerson is the global technology, software and engineering powerhouse driving innovation that makes the world healthier, safer, smarter and more sustainable. Emerson's battery energy management system optimizes battery energy storage system (BESS) operations with flexible, field-proven energy management system (EMS) software and technologies.

What are Emerson/Vertiv network power rectifiers?

Emerson/Vertiv Network Power rectifiers - the heart of the power system - possess some of the highest power densities and smallest footprints in the business. These power solutions can be further enhanced with the addition of intelligent controllers, remote system monitors, battery management units and a full range of distribution modules.

Why are power producers turning to Emerson?

As a power producer, you're facing dynamic times. Renewables, plant cycling, regulatory compliance and an evolving workforce are all making it more difficult for you to achieve your business objectives. It's because of these challenges that more and more power producers are turning to Emerson.

Why did Emerson choose ovation automation?

Emerson's Ovation automation technology was selected by Burns & McDonnell for reliable, secure and robust monitoring and control of three energy storage projects delivering 60 MWh of capacity. Confidently operate, connect, and regulate your solar plant. Efficient wind automation from small parks to large farms.

Headquartered in Columbus, Ohio, the company is a leading provider of thermal management, A/C and D/C power, transfer switches, services and information management systems for the data center and telecommunications industries. Emerson recently reported that the Network Power business had sales of approximately \$4.4 billion in fiscal 2016.
