

What makes Ametek Powervar different?

All AMETEK Powervar products are built around a philosophy called The ABC's of Power Conditioning. These three elements are the core of Powervar's power quality solutions.

Who is Ametek Powervar?

That's why AMETEK Powervar builds power solutions for virtually every place on earth. AMETEK Powervar is a global provider of power management systems, headquartered in Waukegan, Illinois, with international sales and distribution offices in the United Kingdom, Germany, Brazil, Canada, and Australia.

What are Ametek Powervar uninterruptible power managers?

AMETEK Powervar uninterruptible power managers (UPM) combine surge diversion and noise filtering with a highly efficient low-impedance isolation transformer. AMETEK Powervar's Three-Phase UPSs offer reliability and superior design. Each design prioritizes a compact footprint to save valuable floor space in any operating environment.

What products does Powervar offer?

The company's primary products include transformer-based power conditioners and uninterruptible power supplies (UPS). Powervar is ISO 9001:2000 registered and continues to lead the industry by creating higher standards for power quality to support the increasing use of technology in business, government and nonprofit sectors.

Featuring battery backup and power options for critical electronic systems, the AMETEK Powervar LAPC PRO has been designed to safeguard QSR and Convenience Store sites against the detrimental side effects of ...

AMETEK Powervar Ground Guard Power Conditioners incorporate a low impedance isolation transformer, which provide networked systems with benefits beyond those of traditional power conditioning products. Filter elements in the safety ground circuit prevents the formation of "ground loops," which are common in networked applications.

Con los UPS Security Plus Series de AMETEK Powervar, no tiene que sobredimensionar su equipo. La serie Security Plus está diseñada para manejar cargas informáticas modernas (sistemas con factores de cresta altos y periféricos de entrada de alta corriente), por lo que el sobredimensionamiento nunca es un problema.
