

The US renewable energy market has long represented a significant growth opportunity for utility companies across the globe. Trump's shift in policy could dampen this upward trajectory, alongside the global momentum on emission reductions.

As a result, many countries and organizations are rethinking their power generation strategies and opting for renewable sources such as solar and wind for energy production. The adoption of such clean and renewable energy sources is the first step toward mitigating the pollution levels.

The Solar Energy Industries Association<sup>®</sup> (SEIA) is leading the transformation to a clean energy economy. SEIA works with its 1,200 member companies and other strategic partners to fight for policies that create jobs in every community and shape fair market rules that promote competition and the growth of reliable, low-cost solar power.

In the United States, utility-scale solar capacity additions outpaced additions from other generation sources between January and August 2023--reaching almost 9 gigawatts (GW), up 36% for the same period in 2022--while small-scale solar generation grew by 20%. 1 Only 2.8 GW of wind capacity came online during the same period, down 57% from ...

US Solar Market Insight(TM) (SMI) is a quarterly publication on the state of the US solar market. This report is a collaboration between the Solar Energy Industries Association<sup>®</sup> (SEIA<sup>®</sup>) and Wood Mackenzie Power & ...

California holds the largest market share in the U.S. solar panel market. However, there is continuous expansion in markets like Florida, Texas, Utah, and Minnesota. Falling prices are attracting new entrants in the solar industry.

Consumption rates on this rural island are the lowest in the Hawaiian Archipelago, and energy costs are the most expensive in the state, which pays the nation's highest price per watt. For the 7,300 or so residents, that often means forgoing the luxury of ...

Solar energy, which converts energy from the sun into thermal or electrical power, is rapidly expanding across America and the world. Solar energy can provide numerous benefits but, like most things, also has its share of drawbacks.
