

What is the role of the energy sector in the UAE?

The UAE efforts in the field of energy aims to ensure access to affordable, reliable and modern energy services, increase substantially the share of renewable energy in the global energy mix and double the global rate of improvement in energy efficiency. The energy sector plays an important role in shaping the UAE's internal and external policies.

Does Dubai have nuclear energy?

"Country Profile: Nuclear Energy in the United Arab Emirates," World Nuclear Association, October 2022. accessed June 12, 2023. Jessica Morgan, "Dubai's solar park mega project accounts for 15% of emirate's energy production capacity," The National, May 1, 2023.

Will UAE become a gas exporter by 2027?

"UAE on track to become a net gas exporter by 2027," Rystad Energy, August 11, 2022. "New gas discoveries and alternative supply sources will make UAE self-sufficient," Rystad Energy, October 28, 2020. "UAE to tap sour gas fields to go from importer to exporter by 2030," Rystad Energy, July 4, 2019.

Where does the UAE export its natural gas?

According to estimates in the Energy Institute's 2023 Statistical Review of World Energy, the UAE exports its natural gas as LNG, and nearly all of it goes to destinations in the Asia Pacific region. India was the top importing country, taking about 134 Bcf (50%) of UAE's total LNG exports in 2022.

Will UAE reach net zero by 2050?

The UAE federal government and the country's seven emirate governments signed the Net Zero Charter 2050 in March 2023, becoming the first Gulf country to commit to reaching net zero emissions by 2050.

Why is the UAE a net importer of natural gas?

Although the UAE exports natural gas in the form of liquefied natural gas (LNG), it is a net importer of natural gas because domestic natural gas consumption exceeds production. The UAE relies on natural gas imports via pipeline or as LNG from other countries, primarily Qatar, to meet its domestic consumption needs (Figure 3).¹⁸

In 2017, the United Arab Emirates also launched the Energy Strategy 2050, which aims to diversify current energy sources and double the country's use of clean energy sources by 2050. In meeting its commitments and demand for local consumption, the United Arab Emirates is relying on renewable power projects, including solar and nuclear power.
