

How much does a solar battery cost in the UK?

Solar battery prices in the UK range from £3,500 to £10,000, yet they offer a dependable power source during dark winter nights by storing excess energy from the daylight hours. Our comprehensive guide ensures you have the necessary insight on solar battery prices, grants, and savings opportunities to make an informed decision confidently.

How much does a 5kwh solar battery cost?

The average cost of a 5kWh solar battery on its own is roughly £5,000, including the price of installation and an inverter - but this figure will vary based on multiple factors, such as the quality of the battery and the complexity of the installation. A 10kWh battery costs around £7,000 by itself, on average.

How much does it cost to install a solar battery?

The price of installing a solar battery falls by around £2,000-£3,000 if it's installed at the same time as solar panels. The price of the inverter is already folded into the total amount of a solar panel system installation, and adding a battery doesn't involve much additional labour cost either.

What is the cheapest solar battery?

The cheapest type of solar battery that's widely available is the lead-acid battery. These batteries, which you can see in most cars, typically last three to seven years - or less, if you don't keep up with their numerous maintenance needs.

How much does a 10 kW solar battery storage system cost?

A 10 kW solar battery storage system typically ranges in cost from £10,000 to £11,000. To help offset the high initial expenses, various grants like the Smart Export Guarantee (SEG) and the 0% VAT schemes are available. 1.
