

HiNa focuses on low-cost, long-life, high-safety and high-energy density Na-ion battery products. The potential applications cover low-speed electric vehicles, large-scale energy storage, electric vehicles, and national security. The company also supplies cathode and anode materials and electrolytes for sodium ion batteries.

Chinese companies lead the top five global sodium-ion EV battery manufacturers as of 2023. Those include CATL, and HiNa Battery Technology Co., Ltd. America's top sodium-Ion EV battery manufacturer is Natron Energy, Inc., located in Santa Clara, California. The U.K. made the top five list with its Faradion, and France ranked with its Tiamat Sas.

HiNa Battery is a high-tech enterprise focusing on the research and production of next-generation energy storage systems, specifically sodium-ion batteries. They emphasize low-cost, long-life, high safety, and high energy ...

Acculon Energy has partnered with HiNa Battery Technology Co., a global leader in sodium-ion (Na-ion) technology, to bring cutting-edge Na-ion battery solutions to the U.S. This alliance aims to enhance energy storage ...

Acculon Energy has partnered with HiNa Battery Technology Co., a global leader in sodium-ion (Na-ion) technology, to bring cutting-edge Na-ion battery solutions to the U.S. This alliance aims to enhance energy storage through high-performance Na-ion technology, focusing on replacing traditional lead-acid systems in commercial and industrial ...

Proud of and famous for its patented technologies, HiNa is now the fastest and largest sodium-ion battery provider that's been delivering certified commercial-off-the-shelf sodium-ion batteries to both stationary energy storage and moderate-range EVs.

HiNa Battery Technology Co., Ltd. MENU. CN. WeChat. ABOUT US. Company Profile. Company Culture. Teams. Partners. Sodium ion Battery. Be born--Why Na-ion battery. Na-ion battery. ... 1998-2001 Master degree from Wuhan Institute of Technology. 2001-2004 PhD from the Institute of Physics, the Chinese Academy of Sciences . ...

The race to master solid-state battery technology is fully on, which could bring new dynamics to the future battery sector. Governments and blocs around the world - from the United States to European Union - have included its development as official strategies, according to analysis by TrendForce, a market intelligence

Discover Hina Battery, the world's only company specializing in the mass production of sodium ion batteries.

As a leader in advanced energy solutions, we offer cutting-edge sodium ion batteries for grid-scale energy storage and power applications. Explore our innovative technology and join us in shaping the future of energy storage.

Chinese companies lead the top five global sodium-ion EV battery manufacturers as of 2023. Those include CATL, and HiNa Battery Technology Co., Ltd. America's top sodium-Ion EV battery manufacturer is ...

Acculon Energy has announced a strategic partnership with HiNa Battery Technology Co. to bring HiNa's sodium-ion (Na<sup>+</sup>) battery solutions to the U.S. market. This collaboration aims to replace traditional lead-acid systems in commercial and industrial applications with superior Na<sup>+</sup> technology, offering improved safety, performance, and energy ...

The race to master solid-state battery technology is fully on, which could bring new dynamics to the future battery sector. Governments and blocs around the world - from the United States to European Union - have ...

HiNa Battery is a high-tech enterprise focusing on the research and production of next-generation energy storage systems, specifically sodium-ion batteries. They emphasize low-cost, long-life, high safety, and high energy density products.
