

In July 2015, Zambia's Industrial Development Corporation (IDC) signed an agreement with IFC to explore the development of two large-scale solar projects through Scaling Solar. The competitive auction organized by the Government of Zambia and through the program attracted 48 solar power developers, seven of whom submitted final proposals, and the bids ...

Velo Solar's PowerEnfo is the new home for your company's energy data! Are you aware of how your facility and its systems consume energy? According to Phoenix Energy, "The nation's small businesses spend over \$60 billion ...

Velo Solar takes a consultative, design-build, approach to innovate, design and install solar systems that meet the unique energy needs of our clients. We take into account your timing, company goals and your financial realities. We don't sell just solar energy systems, we co-design renewable energy solutions customized for each of our clients. Utilizing this...

We are using state-of-the-art technology for tracking the Sun's path at the Ngonye solar PV plant in Zambia. This is the first time a system of this kind has been used in Sub-Saharan Africa, as we endeavour to provide stable ...

The role is pivotal in ensuring an effective and meaningful engagement between the Global Strategic Partnership department, donors, local partners and relevant government ministries in Zambia that work with vulnerable communities that would benefit from these products.

Specifically for Zambia, regional data accuracy enhancement procedure was applied. Uncertainty of the solar resource data has been reduced by the regional model adaptation based on the ground measurements collected at solar meteorological stations, located across the country. GIS data is provided in higher spatial resolution and also as long-term monthly averages.

Velo Solar is a company that provides solar engineering, procurement, and construction (EPC) solutions. It offers design-build, photovoltaic (PV) system installation and testing, battery-storage operations and maintenance, site survey, energy monitoring, and other services.

As a part of our solar O& M services plan, we also provide remote monitoring to ensure optimal plant performance. Our proprietary real-time monitoring solution allow us to manage the day-to-day operations of your solar energy resources.
