

Should the Biden administration focus on Venezuela?

The Biden Administration should start to focus on Venezuela as a possible diplomatic success story of its own beleaguered foreign policy. This will require thinking beyond zero sum games and allowing the country to have some space for independent relationships with US adversaries like Russia, Cuba and Iran.

Will 2024 be a positive turning point for Venezuela?

The result was an exodus of an estimated 3 million Venezuelans (almost 10% of the population) between 2019 and the present day. Yet, 2024 could be a positive turning point for Venezuela as the political position has agreed to a deal with government of President Nicolas Maduro and the United States has also eased some sanctions.

Is Venezuela a tragic archetype of Kleptocratic governance?

Headlines over the past several years have starkly shown Venezuela as the tragic archetype of how natural resource wealth can incentivize inefficiencies in economic outcomes and kleptocratic governance.

Why is Venezuela a disenchantment of capitalism?

Historically, the rents of oil wealth in Venezuela were not distributed well across the population, and obscene economic inequality led to a disenchantment with capitalism in the 1990s for a majority of the voting populace.

Can Venezuela turn a page in its tragic history?

While the challenges ahead are daunting, there is room for optimism that the country could turn a page in its tragic history and begin a transition towards sustainable development. International development donors and investors should start to revisit the potential for growth and prosperity for Venezuela.

What is a power for good?

Our vision is a future where everyone has access to affordable zero carbon energy. We strive to be a Power for Good through our core values: passion, accountability, collaboration and excellence. These values define our culture and enable our vision. They drive performance and create an environment which is motivating for all our employees.
