How good is Vietnam's energy system?

According to the World Energy System Index for the period 2018-2022, Vietnam held the following positions: 83rd place (2018), 91st place (2019), 65th place (2020), 61st place (2021), and 55th place (2022). Despite fluctuations, the overall trend is positive, indicating significant improvement in Vietnam's energy system performance over five years.

Will Vietnam build a better energy future?

Building a cheaper, cleaner, and more secure energy future for Vietnam will not happen overnight. Other markets further along in development of renewable power greatly benefited from the support of the government.

Can renewables help Vietnam meet its energy needs?

Renewables have the potential to become the lowest-cost option for Vietnam to meet its energy needs. Vietnam's power system is at an inflection point. Over the past five years, load has increased at an average of about 10 percent a year, a staggering pace.

Can Vietnam transition from coal to green energy?

Government investment and green energy investment funds such as JETP are strategically directed towards renewable energy sources, including solar, wind, biomass, hydrogen energy, and efficient energy storage technologies. Consequently, this research substantiates the viability of an energy transition from coal to green energy in Vietnam.

What are the limitations of research in Vietnam's energy sector?

Limitations of the research: The research is constrained by its reliance on materials from government planning until 2025 in Vietnam's energy sector, resulting in limited information for forecasting. The available data sources, comprising open data and background research information, introduce potential errors in the research forecast estimates.

Cumulative investment by Chinese firms in Vietnam's manufacturing abilities is slated to cross \$2.5 billion by this time in 2025, ensuring the country remains a key part of the global supply chain into the near future. Solar inverter maker GoodWe had also picked Vietnam to start its first overseas manufacturing base recently

Kansai Energy Solutions (Vietnam) Co., Ltd. (K-ESV) was established in December 2021 to solve the

problems of such companies by Kansai Electric Power Co., Inc (KANSAI) Since KANSAI has a lot of experiences for low-carbon and energy saving activities in Japan, we can provide high-quality, environmentally friendly energy solutions.

GE Vernova's 50 Hz and 60 Hz gas turbines help Vietnam reinvent its power strategy with lower CapEx and OpEx. Read our blog, and learn why GE Vernova is the right partner for Vietnam's ...
