

Who manages waste in Freetown Sierra Leone?

Waste management in Freetown, under shifting authorities, has been treated as a political football. In the 60s, the Sierra Leone Department of Health and Human Services (DOHSS) was assigned the responsibility. In 1971, DOHSS nominated Freetown City Council (FCC), an urban Health Authority to manage Freetown's solid wastes.

What are the problems with solid waste management in Sierra Leone?

Besides increasing population, in general, problems with solid waste management particularly in Freetown and Sierra Leone in general, are a lack of continuity in implementation of government policies (which are sometimes inadequately formulated), financial and operational constraints, and unfortunate attitude of citizens towards waste management.
