

Why are people moving to solar power in Yemen?

The migration to solar power is part of what researchers say is an energy revolution in the country of 28 million, where the electric grid has been decimated by fighting. More than 50 percent of Yemeni households rely on the sun as their main source of energy, and solar arrays power everything from shops to schools to hospitals.

Does Yemen have solar energy?

According to a recent paper by Berlin-based Energy Access and Development Program (EADP), solar became the main source of energy for Yemeni households after 2016 - two years after the start of its ongoing civil war. EADP said that 75% of the urban population and 50% of the rural population in Yemen have access to solar energy.
