

Does Palestine have a potential for solar power?

The Palestinian territory has a high potential for solar power generation, as it receives around 3,000 hours of sunshine per year. As a result, the Palestinian Authority is looking to attract investments in the renewable energy sector. Inauguration of the solar power plant in a school in Beit Hanina, Jerusalem.

What is the energy problem in Palestine?

The energy problem in Palestine is one of many issues that affect the social and economic conditions of the Palestinian people. The fact that most of the energy is imported at relatively high prices places more financial burdens on poor and marginalized people.

Can solar power power a Palestinian enclave?

So, in recent years, people across the Palestinian enclave have been turning to solar energy to power their businesses and homes. Yasser al-Hajj, who owns a seaside fish farm and restaurant, installed solar panels six years ago. "Electricity is the backbone of the project.

Can solar panels help cut energy bills in Gaza?

Businesses and households in the blockaded Palestinian enclave are turning to solar panels to keep the lights on, and it's helping cut their energy bills. Blockaded by Israel since 2007, the Gaza Strip only has electricity for 12 hours per day on average - less when the conflict escalates.

Are solar panels still used in Gaza?

Raya al-Dadah, head of the Sustainable Energy Technology Laboratory at the University of Birmingham in the UK, says that the solar panels her family uses in Gaza are over 15 years old, so they are no longer new, but, she says, "the water in the shower is still very hot".

Why did Yasser al-Hajj install solar panels?

Yasser al-Hajj, who owns a seaside fish farm and restaurant, installed solar panels six years ago. "Electricity is the backbone of the project. We rely on it to provide oxygen for the fish, in addition to drawing and pumping water from the sea. Without electricity, our project is dead", he told the AFP news agency.
