

What is the energy policy of Trinidad and Tobago?

The Government of Trinidad and Tobago is currently developing a national energy policy green paper that recognises renewable energy's (RE) combined with energy efficiency (EE) and utilisation of compressed natural gas in the transportation sector, inter-alia, as important strategies for the promotion of sustainable development of the nation.

Can a multisource financing facility transform Trinidad & Tobago's energy sector?

The company is publicly listed on the Trinidad & Tobago Stock Exchange. The bank and the Minister of Energy and Energy Industries discussed a multisource financing facility that could have a transformative impact on the region's energy sector. The facility would combine various sources of financing, including from the private sector.

Who owns the energy in Trinidad & Tobago?

In 1994, it divested from its generation holdings on the larger island of Trinidad and now purchases energy from three Independent Power Producers (IPPs): the Power Generation Company of Trinidad and Tobago, which purchased the former T&TEC-operated plants and presently controls 1,386 megawatts (MW) of gas-fired capacity across

Are there green energy sources in Trinidad & Tobago?

As there currently are not many green energy sources available in Trinidad & Tobago, local businesses must work towards developing their own and place additional emphasis on energy efficiency and conservation.

Should Trinidad & Tobago invest in wind and solar energy?

Tapping into Trinidad & Tobago's vast wind and solar resources for domestic electricity consumption would allow it to export more natural gas and use the extra revenue to finance its broader, long-term energy transition plans. Why do financial institutions have a role to play in energy transition?

Where does Trinidad & Tobago stand in terms of solar energy compared to other Caribbean countries? Key developments in solar energy in Trinidad & Tobago The country's installed capacity for solar energy is forecast to register a CAGR of 109% between 2022 and 2027 Renewable energy projects in Trinidad & Tobago have been limited to the pilot scale.
