

Is Zola electric a solar company?

According to Lenihan, ZOLA Electric is not a solar company but one that enables solar. He describes it as a company that creates digital energy where users and suppliers get real-time information about their energy consumption. "There's a need to bring affordable energy and clean energy, and solar does its job there."

How does Zola electric work?

ZOLA Electric sells its products through its partners, who, while serving as distributors, interact directly with customers. They install the ZOLA Electric solutions and help with maintenance. Essentially, it's a business-to-business (B2B) model. For Lenihan, it has been a journey of building and pioneering new technology.

Is Zola a backup solution to Africa's energy crisis?

Lenihan believes ZOLA stands out as not being just a backup solution to Africa's energy crisis but a primary solution. He says the solutions mostly available across Africa and South-East Asia are backup solutions.

What makes Zola a great company?

These forward-thinking organizations are driven by a desire to create a positive impact - financially, socially and environmentally. ZOLA's enterprise technology platform combines the hardware, software, and hands-on support businesses need to become providers of renewable, sustainable, scalable energy solutions.

Why did Zola electric start?

ZOLA Electric's CEO, Bill Lenihan, tells Techpoint Africa that the drive to create the company came from the Co-founders' passion "to solve a big problem [since] 2.2 billion people across the planet do not have access to reliable energy and those people tend to be the ones that need it the most."

What is Zola's enterprise technology platform?

ZOLA's enterprise technology platform combines the hardware, software, and hands-on support businesses need to become providers of renewable, sustainable, scalable energy solutions.
